

Tinotenda Nyashanu

+48729410476 tinotendanyash@gmail.com Warsaw, Poland

Summary

Technical integration specialist and technical trainer with over 3 years of experience implementing ERP solutions and educating users. Strong background in web services (REST/SOAP), data transformation (XML/XSLT), and scripting (JavaScript/Java). Proven ability to break down complex system architectures into practical, hands-on training for both technical teams and non-technical end-users.

Work Experience

Software Integration Developer

DigitalGeeks

January 2024 to Present

- Develop and deploy backend systems, internal CRM solutions, and custom client websites from planning through to launch.
- Build and maintain integrations between varied business systems using REST APIs, databases, and cloud services to automate client workflows.
- Deliver technical consulting directly to clients, explaining architecture choices and providing practical training on how to manage their new custom software.
- Write backend microservices and build out AI-powered features utilizing Python.
- Manage multiple concurrent client projects independently, ensuring technical requirements and business goals are met on schedule.

Client Education & Technical Support Specialist

Foundever, Warsaw, Poland

Feb 2022 – 2025

(Promoted through multiple specialized technical accounts based on high performance metrics, system adaptability, and reliable problem-solving).

Technical Product Educator (8 Sleep Account) | Jul 2023 – Feb 2024

- Educated customers on smart sleep technology, guiding them step-by-step through mobile app connectivity, Wi-Fi configuration, and best usage practices.
- Diagnosed complex hardware and software issues remotely, translating technical solutions into simplified, easy-to-follow instructions for end-users.
- Handled escalated account, billing, and subscription issues while maintaining high customer satisfaction and course-correction ratings.

Education

Vistula University

Bachelor of Science in Computer Engineering
2021 – 2025

42 Warsaw

Software Engineering
2026
